

LITIGATION SUPPORT

Pacific Property Consultants provides complete forensic and claims investigation services for buildings and developments of all types and sizes. We have been retained on over 3,000 such cases involving construction defects, product failures, indoor air quality, water intrusion, builder negligence, inspector and quality assurance negligence, and trade worker liability to name a few. Our principal focus is on the defense of builder and developer claims, including claims involving California's Right to Repair (SB 800), but all types of construction litigation claims are considered.
